How I did it?

Hi, I am Samiksha Das.

For JEE Mains 2019 preparations, I studied NCERT books thoroughly and then proceeded to higher level books. Although school books are not enough for high score, one must have good understanding and grasp on the topics in them.

I used to study 7-8 hours a day for JEE Mains preparation. I geared up for JEE M after class XII Board exams and solved a lot of past papers.

For better preparation, I also enrolled in FIITJEE 2 year distance learning program. The Rankers Study Materials provided by FIITJEE were very good, concise covering all topics with explanation and helped me immensely to improve upon my learning. The Rankers materials very well catered to clear my doubts and better understanding of concept.

The test papers from FIITJEE also facilitated me in a great way to work on and improve my accuracy & speed on solving problems.

During preparation I kept myself away from smart phones / gadgets to avoid distraction and better time management. The constant support from my parents also contributed to my success.
